

SUUPOHJAN KOULUTUSKUNTAYHTYMÄ

ABOUT VUOKSI

Vuoksi Oppitie Campus

Vuoksi provide and develop versatile and high-quality vocational qualification to promote the well-being of the society, region, and people in close cooperation with employers and their establishments and other interest groups.

As a regional vocational upper secondary education provider, Vuoksi have a mission to provide the knowledge and the skills that meet the needs of the working life and future.

We built with our students flexible learning environments and individual studypaths for the motivation of our students to successful learning.

ABOUT VUOKSI

Vuoksi Kyntäjantie Campus

Vocational qualifications in study fields such as agriculture, business and administration, forestry, construction, catering, machinery, media and visual expression, hairdressing, electrical engineering, metal industry, software development, cleaning and property services, animal care and horticulture; altogether 13 study programmes, all accredited by the Finnish National Agency for Education.

Vuoksi also provides [VUOKSI International Services](#), which is the centre and information point. It serves immigrants living in the region, local businesses and basically just anyone interested in international issues. In Kauhajoki we have at the moment people from about 18 different nationalities.

WHAT WE OFFER?

- Free education and the basic equipments and work clothing for studying.
- Safe and modern studying enviroment.
- Free and healthy lunch every school day.
- Guidance and support for the studies; Study advisors and group advisors will work with you to develop a personal competency development plan (HOKS) and assist you with any issues related to your studies.

International Coordinator helps you with other issues of living and being in Kauhajoki.

ACCOMMODATION

Vuoksi co-operates with **Kauhajoki town rental apartments**. We will help you to find and apply accommodation.

We organize to all Finest Future students accommodation in shared rooms but you can also rent your own apartment.

Vocational Qualification in Mechanical Engineering and Production Technology

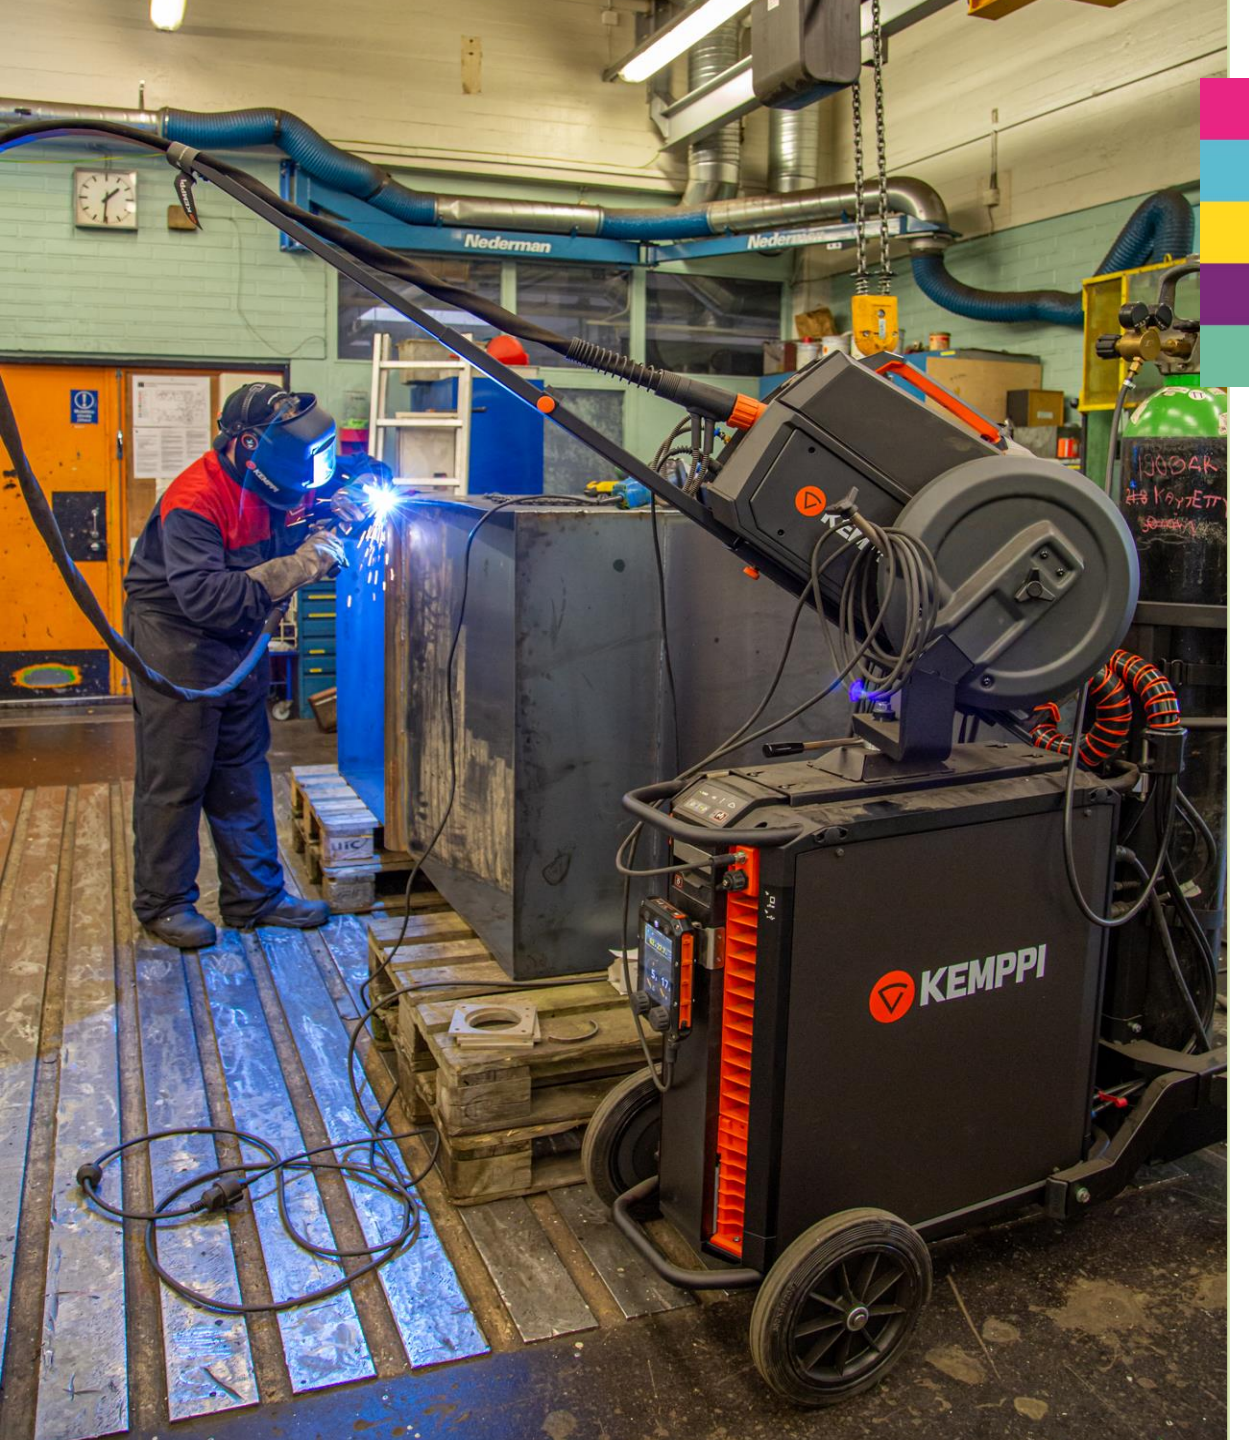

Mechanical Fitter

Mechanical fitters can assemble and install mechanical machines and equipment. Mechanical fitters are able to apply mechanics, hydraulics, and pneumatics in their work. They are also able to install machines and equipment and service them. We have well equipped indoor practical areas. The practice periods are in real local companies.

Mechanical fitters work in tasks involving installation and assembling of different mechanical equipment and machines in industry, repair shops or the customer's facilities. They work as part of production by carrying out assemblies, installing individual parts, or machine parts and by participating in servicing and maintenance tasks. You can also continue studies in upper level in Universities (for example engineer).

Vocational Qualification in Agriculture

Rural Entrepreneur

Competence area of Agriculture

Rural entrepreneurs know how to work in various types of rural enterprises. They have extensive basic knowledge how to keep land fertile and the factors that affect plant growth. They possess good technical skills and know how to use and take care of the machinery and equipment necessary for their work.

Depending on their choices, they know how to manage production animals and promote their welfare, pursue forestry methodically, serve customers, or use and plan the production technology and the building stock of their enterprise.

Rural entrepreneurs work in farms, companies providing interlacing, working, machinery, bioenergy and landscape maintenance services as an entrepreneur or employee.

Additional information, videos and applying:
